DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 7-16, 19-22, 37-42, 45-49, 57 and 58, drawn to a locking mechanism.

Group II, claim(s) 23-25, drawn to a hypodermic needle assembly having a needle, retainer with elongate bore, push-fit between needle and bore.

Group III, claim(s) 26-36, drawn to a hypodermic needle having a fluid container, main body with shoulder, cylindrical neck portion and open front end, needle retainer being removably insertable through the open front end of the neck portion and having a needle retainer and needle.

Group IV, claim(s) 53-56, drawn to a syringe device having a barrel portion, plunger, barrel portion having an eccentrically located neck, means of preventing rotation of plunger in a barrel.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I has a retainer part having flexible legs; Group II has a needle assembly, retainer with elongate bore with a push-fit between needle and bore; Group III has a needle retainer removable insertable through the neck portion and Group IV has a means of preventing rotation of plunger in the barrel.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
